Introduction

TVman Home streams live TV and media in your home wireless network for all your family.

- Any smart devices can act as an **additional TV at home**. Every family members can now have their own choice of entertainment.
- TVman is **universal**, it can work with over 100 models of smartphone, tablet and computer in the market.
- Multiple TVman can be connected to the same router to propose **multiple TV channels** for anyone.
No dispute on who will select the program for tonight!
- Enjoy Live TV **anywhere at home**. Finish watching your program on the bed, watch TV while cooking, ironing, gardening, bathing, barbecue... TVman offers Flexibility, freedom and comfort unmatched by conventional TV.
- TVman Home is also a **media center** to share your video, music, pictures in your wireless network to be played by **8 devices** at the same time!
- You are busy and the live TV broadcast does not always fit with your schedule. No problem, you can easily program TVman to **record automatically** thousands of hours of TV on external USB HDD when you are away from home, the program will be waiting for you!
- TVman is also a **smart catch up** able to record automatically any live program **you may like** according to your centers of interest: sport, documentaries, show, movies...

Wireless Network

TVman Home is connected to your router by LAN or via WiFi to stream live TV & media in your home wireless network.

- ✓ **Better coverage:** Your router offers the best Wi-Fi coverage in your home so you can enjoy live TV and media from any rooms, balcony, terrace, garden...
- ✓ **Available for all:** At home, all your smart devices and computers are already connected to the network. You just have to click on the application to access TVman services! One can watch TV while others can play media or watch recorded files from TVman USB hard drive.
- ✓ **Internet access:** When watching TV or media via the router, your smart devices will keep access to Internet.

Connected Directly to TVman

Access Point

If you have no router connection, TVman can also create its own WiFi access point **anywhere** and offer the same services (live TV, media, recordings).

- ✓ It can therefore also be used for your weekend residence, vacation, camping car, boat, campus dormitory, hospital, nursing home..
- ✓ An optional battery can also be used to watch live TV during your escape (picnic, beach...).
