

TVMAN™ Mobility

Entertainment on the go

5 in 1

-   Live TV
-   Media Center
-   Memory Extension
-  Programmable Video Recorder
-  Power Bank

Microsoft
Windows

Introduction

- TVman Mobility is a personal TV tuner combining **all the functions** you need on the go in one device only.
- It is cheaper, compact, lightweight and can fit in your pocket discreetly to follow you **anywhere** you go.
- TVman is **universal**, it can work with over 100 models of smartphones, tablet and computer in the market.
- The **TV reception** (TVman) is totally independent of the display (your tablet). You can therefore place TVman where the TV signal is stronger (window) and keep the freedom to watch wherever you like (sofa, bed, Kitchen...), in the position you like, without affecting the TV reception.
- TVman can be **programmed to record automatically** the live TV so you will never miss any program anymore.
- You can also use it as a **Wireless Media Center** to share your video, music, pictures or others files with up to 8 Smart devices.

On the Go

TVman creates it's own WiFi to become a TV and media **access point anywhere**. No need of a router or Internet access and with no effect on your 3G/4G data plan.

- ✓ You are busy and the live TV does not always fit with your schedule? No problem, you can **take your TV and PVR with you** anywhere you go to watch your favorite program in live or record it if you are not available. TVman rechargeable and exchangeable battery will entertain you for more than **4hours on the go**.
- ✓ Your smartphone memory is almost full? Use TVman SD card as a **wireless memory extension** to store media files and play!
- ✓ You want to share pictures and videos from your weekends with friends? Want to entertain all your family while traveling? Use TVman as a **media center** to share videos, musics or pictures with 8 devices at the same time!
- ✓ You never have your **power bank** with you when you really need it? Inconvenient to carry with you all day long? No worries, TVman can also charge your phone!

"4 hours entertainment"

At Home

At home, TVman will automatically connect to your router and stream live TV and media files in your **home wireless network**.

- ✓ TVman is an **additional TV** at home offering a second choice for your family. No dispute on who will select the program for tonight!
- ✓ It can be programmed to **record automatically** while you are away from home on weekend, during vacation... Your favorite shows will be waiting for you!
- ✓ Acting as a **media center**, TVman will share the TV recording, videos, musics, pictures stored in the SD card through your wireless network.
